

Prefix Sum

Lecture-34

Raghav Garg

COLLEGE
WALLAH

What is Prefix Sum?

$$\text{arr} = \{ 1, 4, 5, 3, 2, 7, 6 \}$$

$$\text{pre} = \{ 1, 5, 10, 13, 15, 22, 28 \}$$

M-1: T.C. = $O(n^2)$ \rightarrow no. of ops = $1 + 2 + 3 + 4 + \dots + n$

M-2: Single pass \rightarrow T.C. $O(n)$

Ques: Running sum of 1D Array

[Leetcode - 1480]

$$\begin{array}{cccc} & 0 & 1 & 2 & 3 \\ \text{nums} = & [1, 3, 6, 10] \end{array}$$

$a, b \rightarrow \text{sum}$

$\text{pre}[b] - \text{pre}[a-1]$

$$\begin{array}{l} \text{for } (i=1 \text{ to } i=n-1) \{ \\ \quad | \quad \text{nums}[i] = \text{nums}[i] + \text{nums}[i-1]; \\ \quad \} \end{array}$$

for ex :
$$\begin{array}{cccccccccc} & 0 & 1 & 2 & 3 & 4 & 5 & 6 & 7 & 8 \\ & [9, 1, 8, 6, 5, 2, 4, 3, 10] \end{array}$$

$$\hookrightarrow [9, 10, 18, 24, 29, 31, 35, 38, 48]$$

Ques: Check if array can be partitioned into 2 continuous arrays of equal sum.

arr = { 1, 2, 3, 4, 5, 6, 7, 8, 9 }

pre = { 1, 3, 6, 10, 15, 21, 28, 36, 45 }

0 1 2 3 4 5 6 7 8

→ x

0 to x == x+1 to n-1

↓
pre[x] = pre[n-1] - pre[x+1-1]

$2 * pre[x] = pre[n-1]$

Ques: Product of array except self

[Leetcode - 238]

arr = { 1, 2, 3, 4 }

product = 24

ans = { 24, 12, 8, 6 }

prefix product

pre = { 1, 2, 6, 24 }

$pre[i] = arr[i] * pre[i-1]$

COLLEGE
WALLAH

Ques: Product of array except self

[Leetcode - 238]

$$\text{arr} = \{1, 2, 3, 4\}$$

$$\text{pre} = \{1, 1, 2, 6\}$$

$$\text{suf} = \{24, 12, 4, 1\}$$

$$\text{ans} = \{24, 12, 8, 6\} \checkmark$$

$$\text{p} = \cancel{1} \times 2 \times 3 \times 4 \quad \text{p}^+ = \text{nums}[i]$$

$$\text{p} = \cancel{1} \times 1 \times 2 \times 4$$

Concept Involved : For Every Element \rightarrow product of all other elements
 $=$ product of all other in left part
 \times product of all other in right part

Ques: Product of array except self

$nums = \{ 4, 2, 5, 3 \}$
 $pre = \{ 1, 4, 8, 40 \}$
 $suf = \{ 30, 15, 3, 1 \}$

[Leetcode - 238]

$pre[0] = 1$

$p = nums[0]$

$p = 4 \times 8 \times 40$

$suf[n-1] = 1$

$p = nums[n-1]$

$p = 3 \times 15 \times 30$

Suffix Sum:

$$\text{arr} = \{ 1, 2, 3, 4 \}$$

$$\text{pre} = \{ 1, 3, 6, 10 \}$$

$$\text{suf} = \{ 24, 24, 12, 4 \}$$

Suffix Product:

$$\text{arr} = \{ 1, 2, 3, 4 \}$$

$$\text{prep} = \{ 1, 2, 6, 24 \}$$

$$\text{sufp} = \{ 24, 24, 12, 4 \}$$

$$\text{ans} = \{ 24, 12, 8, 6 \}$$

Ques: Minimum Penalty for a shop

[Leetcode - 2483]

String c = ^{0 1 2 3 4}
Y Y N Y

10th baie shop → yes

11th baie → yes

12 baie → no

13 baie → yes

14 baie → close

Penalty = 0 / 1

0th → band

Penalty - 0, 1, 3 → 3

1st → band kar dete

penalty - 2

0 + 1 + 0 + 1 = 2

2nd hour band kar deen

penalty - 1

3rd hour → penalty - 2

4th hour → 1

Ques: Minimum Penalty for a shop [Leetcode - 2483]

After closing the shop \rightarrow penalty = no. of Y after that hour

penalty if we close the shop at n^{th} hour

= no. of 'Y' $\geq n$ + no. of 'N' before n^{th} hour

including & after
 n^{th} hour

= Y ka suffix sum + N ka prefix

$s =$ 0 1 2 3 4
 Y Y N Y

 $pre =$ 0 1 2 3 4 N
 0 0 0 1 1 Y

 $suf =$ 3 2 1 1 0

 $pre =$ 3 2 1 2 1

$minPen = 1$

COLLEGE
WALLAH

```
// YNYY // 0
for(int i=0;i<n;i++){
    int count = 0;
    if(customers[i]=='N') count++;
    pre[i+1] = pre[i] + count;
}
```

	0	1	2	3	4
	Y	N	Y	Y	
pre	0	0	1	1	1
suf	3	2	2	1	0

Ques: Reducing Dishes

[Leetcode - 1402]

↳ Sorting & Suffix Sum

1) Chef can prepare the dishes in any order

2) He can also discard some/all dishes

$$\Rightarrow 1 \times 4 + 2 \times 3 + 3 \times 2 = 4 + 6 + 6 = 16$$

{ 2, 3, 4 }

$$\hookrightarrow = 1 \times 2 + 2 \times 3 + 3 \times 4 = 2 + 6 + 12 = 20$$

Ques: Reducing Dishes

[Leetcode - 1402]

$$\text{arr} = \{-1, -8, 0, 5, -9\}$$

Sort \hookrightarrow $\text{arr} = \{-9, -8, -1, 0, 5\}$

$$\left[\begin{array}{l} \Rightarrow 1 \times -9 + 2 \times -8 + 3 \times -1 + 4 \times 0 + 5 \times 5 \\ \Rightarrow -9 - 16 - 3 + 0 + 25 \\ \Rightarrow -3 \text{ (is bad)} \end{array} \right] \alpha$$

$$\Rightarrow \{0, 5\}$$

$$\Rightarrow 1 \times 0 + 2 \times 5 = 0 + 10 = 10 \text{ (is better)} \right] \alpha$$

$$\{ -1, 0, 5 \}$$

$$= 1 \times -1 + 2 \times 0 + 3 \times 5$$

$$= -1 + 0 + 15$$

$$= 14$$

Ques: Reducing Dishes

[Leetcode - 1402]

$$\{-8, -1, 0, 5\}$$

$$\Rightarrow -8 \times 1 + -1 \times 2 + 0 \times 3 + 5 \times 4 = -8 - 2 + 20 = 10$$

- All dishes with +ve satisfaction values must be taken & some of the dishes with negative value can be taken.

$$\{x \rightarrow \{-9, 3, 4, 5\}$$

$$\Rightarrow -9 \times 1 + 3 \times 2 + 4 \times 3 + 5 \times 4$$

$$\Rightarrow -9 + 6 + 12 + 20$$

$$\Rightarrow \boxed{29} > 26$$

$$\{3, 4, 5\}$$

$$3 \times 1 + 4 \times 2 + 5 \times 3$$

$$= 3 + 8 + 15 = 26$$

Ques: Reducing Dishes

sort \rightarrow arr = $\{-1, -8, 0, 5, -9\}$
 \rightarrow arr = $\{-9, -8, -1, 0, 5\}$

suffix array \rightarrow suf = $\{-13, -4, 4, 5, 5\}$
 \downarrow
 idx

Ques: Longest subsequence with limited sum

[Leetcode - 2389] (!easy)

nums = { 4, 5, 2, 1 } $\rightarrow n$

↓ Sort ($O(n \log n)$)

nums = { 1, 2, 4, 5 }

↓ prefix sum ($O(n)$)

nums = { 1, 3, 7, 12 }

len = 0 1 2 3 4

queries = { 3, 10, 21 } $\rightarrow m$

ans = { 2, 3, 4 } $\rightarrow m$

```
for(int i=0;i<m;i++){
    int len = 0;
    for(int j=0;j<n;j++){
        if(nums[j]>queries[i]) break;
        len++;
    }
    ans[i] = len;
}
```

[sorting, prefix sum, Binary Search]

Ques: Longest subsequence with limited sum

[Leetcode - 2389]

→ Sorting & prefix sum

nums = {1, 3, 7, 12}

queries = {3, 10, 21} → m

ans = { } → m

Thank you!
